

Amendments to the Specification

Please replace the below listed paragraph in the specification with the following paragraphs:

Second full paragraph beginning on line 17 of page 25 with:

According to embodiments of the invention, the manifest collection 1040 contains a listing of namespace/solution pairs 1055 for directing a document to a document solution maintained at one or more manifests 1038. The manifest collection 1040 serves as a central repository for maintaining a listing of solutions for all the different namespaces referenced by documents maintained an[[d]] operated by the organization. On each user's computer 20, a registry key is designated for pointing the user's computer 20 to a uniform resource locator (URL) associated with the manifest collection. If the user opens a document referencing a document solution associated with one or more namespaces, the document may point to the URL of the manifest collection via the registry key set on the user's computer 20 and pass the name of a given document namespace to the manifest collection 1040.
